PROFESSIONAL SUMMARY

Backend-focused Full-Stack Engineer experienced in building REST APIs, database-backed applications, authentication systems, and third-party integrations. Works primarily with Python, FastAPI, TypeScript, Node.js, and relational databases. Comfortable working across backend services and frontend applications to deliver functional, maintainable software. Interested in API architecture, database design, system reliability, and building practical solutions to real-world problems.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, SQL, Bash

Backend Development: FastAPI, Node.js, Express.js, REST API Development, JWT Authentication, Role-Based Access Control (RBAC)

Databases and ORM: PostgreSQL, MySQL, MongoDB, SQLAlchemy, Prisma, Mongoose

Frontend Development: React, Next.js, HTML, CSS, Tailwind CSS, Axios

Tools and Infrastructure: Git, GitHub, Docker, Docker Compose, Linux, Nginx, Alembic, CI/CD Fundamentals

Integrations: Paystack, WhatsApp Cloud API, Payment Verification, Email Integrations

PROFESSIONAL EXPERIENCE

Blockfuse Labs

Full-Stack Engineer Intern | July 2026 – Present

- Contribute to full-stack application development, working across backend services and frontend features.
- Build and integrate application functionality with APIs and database-backed systems.
- Collaborate with other developers to implement features, investigate bugs, and improve application reliability.
- Apply software engineering practices to build maintainable and well-structured applications.

TrueMinds Innovation

Backend Engineer Intern | 2025 – 2026

- Worked on backend APIs and database-backed application features.
- Implemented API functionality for assignments, submissions, grading, feedback, and progress tracking.
- Worked on enrollment, course-related routes, and application data management.
- Implemented authentication and role-based access control to protect application resources.
- Supported frontend integration by connecting React interfaces to backend endpoints.
- Worked with Docker Compose and Nginx in application deployment and environment configuration.

SELECTED PROJECTS

ConFam

Merchant Payments and Sales Management Platform

- Contributed to a WhatsApp-first platform designed to support merchant onboarding, payment workflows, and sales records.
- Worked on backend functionality involving payment links, bank resolution, and merchant-related operations.
- Integrated payment and messaging workflows using Paystack and WhatsApp Cloud API.
- Worked with database migrations and application testing.

Technologies: Python, FastAPI, PostgreSQL, Paystack, WhatsApp Cloud API, Alembic, Docker

Vintique

E-commerce Application

- Contributed to backend functionality for an e-commerce application.
- Worked on API endpoints and product-management functionality.
- Implemented or improved payment-verification and product soft-deletion workflows.
- Supported database operations and backend maintenance.

Technologies: Python, FastAPI, PostgreSQL, SQLAlchemy, Payment Gateway Integration

Nex Innovations

Website and Supporting API

- Contributed to a web application built with Next.js and TypeScript.
- Worked on API integration and database-related fixes.
- Improved application validation and supported email-related functionality.
- Contributed to deployment and application maintenance tasks.

Technologies: Next.js, TypeScript, Express.js, Prisma, PostgreSQL

Build Planner

Business Planning Application

- Contributed to a business-planning application with a guided questionnaire and structured plan preview.
- Worked on form validation and frontend integration with application APIs.
- Contributed to the plan export experience, including PDF download states and error handling.

Technologies: Next.js, React, TypeScript, Zod, React Hook Form, REST API Integration

ADDITIONAL STRENGTHS

- REST API design and integration
- Relational database modelling
- Authentication and authorization
- Backend debugging and troubleshooting
- Full-stack application development
- Docker-based development environments
- Collaboration using Git and GitHub
- Practical problem-solving and maintainable code
